

VIRTUAL REALITY – developed for engineers, perfected for business

With **WeAre Rooms** it is easy to share and edit complex 3D CAD data with colleagues, customers or suppliers from anywhere in the world.

"Thanks to **WeAre Rooms**, we were able to avoid a serious assembly error that we would have missed without 3D representation in VR. This saved us additional costs for materials and assembly of over **80.000 euros** as well as two to three weeks more working time."

INNOVATIVELY DESIGNING PROCESSES & WORKFLOWS TOGETHER

SALES & SERVICE

- 🌀 walk through plants and present machines
+ product experience in real-time
- 🌀 digital salesroom
+ optimized sales processes
- 🌀 record customer wishes directly at the object
+ strengthen customer loyalty

PRODUCT DEVELOPMENT

- 🌀 immersive 3D CAD models
+ develop and decide more efficiently
- 🌀 exploded view
+ detect and mark defects
- 🌀 X-Rays and measurements
+ native visualization

MEETING & REMOTE

- 🌀 decentralized collaboration
+ saves time and travel costs
- 🌀 VR teamwork in groups
+ for active exchange
- 🌀 writing and drawing in 2D/3D
+ familiar tools (e.g. whiteboards, notes)

PLAN, ANALYZE AND PRESENT WITH INNOVATIVE TOOLS

YOUR CAD DATA

Import all popular 3D CAD formats for viewing and editing.

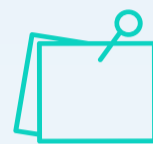

WALK THROUGH PLANTS

Walk through your plants and experience your product as if it were already built.

EXPLODED VIEW

Analyze and mark individual components of your product in VR.

NOTES

Attach documents, notes or voice memos directly to the components of your machine.

X-RAY

Create a cross section and look directly into the 3D CAD object.

MEASUREMENT

Measure natively your 3D CAD object regardless of scaling.
